

LabVIEW Developer

ProDSP Technologies is a design house, a competence center and a manufacturing partner. ProDSP delivers turn-key solutions for engineers in the automotive and industrial electronics field. Our goal is to provide state-of-the-art technology to our industrial customers.

Main areas of activity are: hardware design, embedded firmware, signal processing, image processing, industrial measurement technology and test systems, manufacturing services.

Our current team of 25 engineers in Budapest, Hungary is dynamically expanding. We need engineers who want to do actual design work and do the core technical development tasks, who like to work on a wide range of projects and who want to learn.

Position summary:

Designing applications for automated test environments.

Tasks:

- Develop softwares for an automated test environment
- Actively participate in the developing process (implementing, code review, developer test, error scan)
- Create documentation of the development
- Communicate with colleagues in Hungary and abroad
- Product support (software and hardware)

Essential Requirements:

- Electrical Engineer or Mechatronics Engineer degree
- Experience in electrical connecting design
- Profound knowledge of LabVIEW programming language
- Familiar with measuring technology
- Intermediate, skill-based oral and written English language

ProDSP Technologies Zrt.
1035 Budapest, Raktár u. 25-31.
