

Fundamentals of **Industrial Measurement** Technology

Smart Camera System

ProDSP Post Series Nr.25.

What is Smart Camera System?

- An integrated system that:
 - Handles the camera
 - Runs the algorithms
 - And delivers results directly

Advantages

- Significantly shorter development time
- Easier commissioning
- High robustness
- Fewer potential points of failure

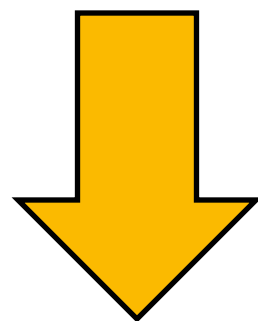

Disadvantages

- Limited configurability
- Accuracy usually falls behind that of custom systems
- Usable only when the task does not require special geometry or high resolution
